

Construct Lc

Version 1.0 | September 2026 | Product: Construct Lifecycle | Short Brand: Construct LC | Descriptor: The Construction Lifecycle Platform | Tagline: From Bid to Closeout.

SUMMARY

Construct LC is a multi-tenant construction lifecycle platform.

PRODUCT DESIGN OBJECTIVE

Construct LC is a multi-tenant construction lifecycle platform.

The interface must allow users to understand: 1. What projects exist 2. Where each project is in its lifecycle 3. What needs attention 4. What has happened 5. What happens next 6. What the project is worth 7. What has been committed 8. What has been spent 9. What has been delivered 10. Whether the project is profitable 11. What remains to close the project

The primary UX principle is: Users should never have to reconstruct the state of a project from multiple disconnected systems.

CORE UX MODEL

The application is organized around the Project.

The Project is the central object connecting: Customer → Opportunity → Bid → Estimate → Award → Contract → Products → Procurement → Orders → Deliveries → Costs → Revenue → Change Orders → Closeout

This creates the Construct LC data and navigation model.

PRIMARY NAVIGATION

Desktop navigation should use a persistent left sidebar.

HOME: Dashboard, My Work, Notifications PIPELINE: Opportunities, Bids, Estimates, Proposals PROJECTS: All Projects, Active Projects, Contracts, Milestones OPERATIONS: Products, Selections, Procurement, Purchase Orders, Deliveries, Receiving FINANCIAL: Revenue, Commitments, Costs, Billing, Change Orders, Margin CLOSEOUT: Open Items, Documentation, Final Billing, Closed Projects INSIGHTS: Dashboards, Reports, Analytics, Construct Intelligence ADMINISTRATION: Organization, Users, Roles, Customers, Vendors, Integrations, Settings

DESIGN NORTH STAR

The Construct LC interface should make a complex construction project feel simple.

The user should always know: Where am I? Where is the project? What changed? What needs attention? What happens next? What is the financial impact? What does "done" look like?

PRIMARY UX STATEMENT

ONE PROJECT. ONE LIFECYCLE. ONE SOURCE OF TRUTH.

CONSTRUCT LC From Bid to Closeout.
